Key Description: JAYWALKING

Problem Description:

Constable Kristensen noticed a high number of students from ME Lazerte High School choosing not to cross at the marked crosswalks when crossing to or from school property.

Problem solving strategies and results :

A warning note was placed on the daily bulletin to notify violating students.
A point of being highly visible on the front sidewalk was made by Cst Kristensen, especially during the morning arrival period, and then randomly throughout the day.

Eight jaywalking tags were issued. As well, the Transportation Department was contacted about having one of the crosswalks relocated to a more convenient location.

The result of this was a far greater rate of compliance for crossing the street.
